Wilmotte and associates design the future of Insead business school

Batiactu · source

The INSEAD business school in Fontainebleau, located 70 km south of Paris, inaugurated two new buildings on August 24, 2026. This development is part of a ten-year ambitious renovation and restructuring plan for their 56,000 m² campus, initiated to enhance future teaching and learning in management. Founded in 1967, INSEAD hosts 1,300 students annually and aims to shape its campus for future challenges.

"Cooling all French high schools is not feasible," V. Pécresse (IDF Region)

Batiactu · source

Valérie Pécresse, the president of Île-de-France, announced that a large-scale air conditioning plan for regional high schools is not feasible. This decision comes as a response to ongoing calls for measures against repeated heatwaves. The article highlights the reasoning behind the conclusion that such extensive renovations are impractical.

MaPrimeRénov': discover the list of mono-actions still financially supported

Batiactu · source

MaPrimeRénov' has not entirely eliminated single-gesture aids, as some still persist amid increasing electrification and reforms. Despite changes, 84% of this topic remains unexplored, signaling further developments in housing aid. The content, however, is exclusively available to subscribers.

BTP Consultants strengthens with a new appointment

Batiactu · source

BTP Consultants has strengthened its team with the appointment of a new expert in technical control. This move reflects the company's commitment to enhancing service offerings in the construction sector. The article emphasizes the importance of professional expertise in meeting industry demands.

Thermal insulation of piping

Batiactu · source

Choosing the right insulation for pipes is crucial for energy performance and reducing operational costs. Key factors include thermal conductivity, surface emissivity, and fire behavior, which significantly impact insulation effectiveness. Options such as phenolic foam provide optimal thermal performance, while mineral wool and elastomeric solutions serve specific project needs.

In Alençon, Cedeo and Point.P brands inaugurate a joint showroom

Batiactu · source

Cedeo and Point.P have inaugurated a shared showroom in Alençon, enhancing product visibility for interior and exterior fittings, as well as sanitary equipment. This collaboration aims to streamline customer experiences by showcasing a comprehensive range of offerings in a unified space. The

initiative reflects a strategic move to improve service delivery in the construction sector.

Spie will build new battery parks in Belgium

Batiactu · source

Spie, a French group, is set to build two new battery parks in Belgium. This initiative aims to enhance energy storage capabilities in the region. The projects reflect Spie's commitment to advancing sustainable energy solutions.

Despite heat waves, the shutter market struggles to take off

Batiactu · source

L'article souligne l'importance de fermer les volets pendant les périodes de forte chaleur pour éviter la surchauffe des logements. Il met en évidence l'urgence d'équiper les habitations dépourvues de volets afin d'assurer un confort thermique. Malgré cette nécessité, le marché des volets peine à décoller.

Spie signs an energy performance contract with the German city of Reutlingen

Batiactu · source

Spie has secured an energy performance contract to significantly reduce energy consumption at the Reutlingen training center in Germany. This project involves upgrading multiple buildings facing energy obsolescence. The initiative focuses on enhancing energy efficiency and sustainability.

Eiffage wins two new hospital contracts

Batiactu · source

Le groupe Eiffage va construire deux nouveaux hôpitaux, renforçant ainsi sa position dans le secteur de la santé. Ce projet témoigne de l'engagement d'Eiffage à répondre aux besoins croissants en infrastructures médicales. Les détails complets de ce projet sont disponibles pour les abonnés.

Presidential election and housing: G. Attal, B. Retailleau and J-L. Mélenchon present their proposals

Batiactu · source

During the Rencontre des entrepreneurs de France on August 27, 2026, seven declared presidential candidates presented their economic programs. Topics included housing, albeit briefly discussed. This event highlighted the candidates' efforts to engage with the business community.

Icade bets on new uses of the office

Batiactu · source

Icade has acquired 81.5% of Comet, strengthening its position in new uses of tertiary real estate. This move reflects Icade's commitment to adapting to evolving demands in the workspace market. The article discusses the implications of this acquisition for Icade's strategic direction.

Bouygues will create a tower of nearly 250 meters in Thailand

Batiactu · source

Bouygues Construction is set to build a new luxury residential tower in Pattaya, Thailand, aiming to be one of the tallest in Southeast Asia. The project reflects a significant investment in luxury real estate, enhancing the skyline of the region. This development emphasizes Thailand's burgeoning property market.

Hoffmann Green Cement aims to incorporate scallop shells into its cements

Batiactu · source

Hoffmann Green Cement is innovating by developing a type of cement that incorporates waste from Saint-Jacques shells. This initiative highlights their commitment to sustainability and the circular economy in construction materials. The company aims to reduce environmental impact while maintaining performance standards.

Eiffage reports a solid first half of 2026 with a strong order backlog

Batiactu · source

Eiffage, a major player in the French construction industry, reported strong financial results for the first half of 2026 during a press conference. The CEO, Benoît de Ruffray, highlighted the success attributed to various factors impacting the company's performance. Overall, the company conveys a positive outlook amidst challenges.

Ursa's XPS insulation activities may change hands

Batiactu · source

Adovi Adote has been appointed as the new general director of Ursa France, focusing on biosourced segments and off-site construction. Ursa, previously owned by Xella, was purchased by Etex in 2022, and its extruded polystyrene insulation activities across France, Spain, Italy, and Germany may be affected. The company is navigating significant changes in the construction materials sector.

The market for shutters remains under pressure

Technicbaie · source

Le marché français des volets continue de diminuer, tombant sous les cinq millions d'unités en 2025 en raison de la crise du logement et d'une baisse des rénovations. Malgré quelques signaux positifs pour 2026, la prudence demeure de mise avec des prévisions de croissance fragiles. La rénovation reste le principal moteur du marché à court terme, même si des améliorations sont attendues à partir de 2027.

The strength of the arms, the asset of the pantograph awning

Technicbaie · source

Le Garage d’Eugène, situé au pied du Mont-Saint-Michel, a choisi le pantographe Socotex pour sa terrasse, offrant esthétique et fonctionnalité face aux conditions climatiques. Ce store, innovant et résistant, permet une utilisation tout au long de l'année et se distingue par son système de bras en croisillon, remplaçant les poteaux traditionnels. Grâce à sa conception, le pantographe allie robustesse et design, répondant aux exigences esthétiques et fonctionnelles du propriétaire.

Malerba moves into its new headquarters

Technicbaie · source

Malerba has moved to its new headquarters in Thizy-les-Bourgs as of July 15, 2026, marking a significant organizational transition after 50 years in Cours-la-Ville. The 3,822 m² building, named 'Maison Malerba', emphasizes environmental sustainability and resource optimization. This investment of over 10 million euros highlights the company's commitment to digitalization, cohesion, and responsible practices in the construction sector.

Clarification for PAP and physical obstacles

Technicbaie · source

La commission S61I a clarifié que les freins pour le maintien de position ne sont pas soumis à la norme NF S61-937-13, qui concerne le verrouillage des issues. Cela évite des coûts supplémentaires pour des tests de conformité pour les dispositifs PAP. La distinction entre frein et verrouillage est essentielle pour les équipements utilisés dans des lieux publics comme les gares et les aéroports.

Springless sectional doors: Javey strengthens its production capacity

Technicbaie · source

Javey has launched a new profiler dedicated to producing axes for its springless industrial sectional doors, enhancing production capacity. This investment, supported by France Nation Verte, aims to transform technical innovation into a sustainable industrial solution. The springless doors simplify installation and improve availability, marking a significant advancement in the industry's technology.

Dickson, fabrics for all outdoor spaces

Technicbaie · source

Dickson offers a variety of outdoor fabrics designed for comfort and aesthetics, transforming spaces like gardens and terraces into stylish retreats. With over 200 color options, these fabrics provide effective sun protection and blend beautifully with different architectural styles. Their innovative designs enhance thermal comfort while allowing for creative personalization of outdoor areas.

"Yes to protecting heritage, but also yes to housing and adapting to climate change"

Technicbaie · source

The Minister of Housing advocates for balancing heritage protection and the urgent need for housing adaptations to combat climate change. He emphasizes empowering mayors and prefects to ensure local projects aren't hindered by architectural approval alone. Ultimately, he calls for a living heritage that allows people to inhabit and thrive physically and culturally.

ES-SO proposes a cooling scale

Technicbaie · source

L'ES-SO encourage l'UE à adopter une "Échelle de refroidissement" pour améliorer le confort thermique des bâtiments en intégrant des solutions passives et actives. Cette approche vise à réduire le risque de surchauffe tout en s'alignant sur la directive sur la performance énergétique. L'échelle permet de structurer les mesures nécessaires pour créer des bâtiments résilients et économes en énergie.

School: Professionals gathered around building overheating

Technicbaie · source

Professionals gathered in Poissy to address the overheating of school buildings during a heatwave. The conference showcased technical solutions for improving summer comfort and energy performance in educational institutions. Collaboration between the city and industry stakeholders highlighted the importance of solar protections and innovative renovation strategies.

Innovation Awards Batimat/Equipbaie, innovation in the spotlight

Technicbaie · source

The Innovation Awards at the Batimat/Equipbaie 2026 showcased 38 winners in various categories such as woodworking and solar protection. Notable awards included Technal for facade renewal and KE France for innovative solar shading solutions. The event highlighted advancements in sustainability and design in the building industry.

FFB denounces the elimination of MaPrimeRénov' aid for renovation work

Technicbaie · source

La FFB critique la décision du gouvernement de supprimer les aides MaPrimeRénov' pour les travaux d'isolation, menaçant ainsi la rénovation énergétique abordable pour les ménages modestes. Cette décision est jugée contraire aux objectifs environnementaux et met en difficulté des artisans. La FFB appelle à une politique stable pour soutenir la transition écologique dans le bâtiment.

The essential automation of solar protections

Technicbaie · source

L'automatisation des protections solaires est essentielle pour optimiser le confort et l'efficacité énergétique des immeubles de bureaux, mais sa mise en œuvre reste souvent incomplète ou mal adaptée. Les exigences réglementaires, bien que pesantes, soulignent l'importance d'intégrer ces systèmes dès la conception des projets immobiliers. Une bonne gestion et maintenance des automatisations sont cruciales pour maximiser leur potentiel et répondre aux attentes des utilisateurs.

Site management from A to Z

Technicbaie · source

L'article explore l'évolution de la numérisation dans le secteur de la menuiserie et de la fermeture, soulignant un passage d'outils limitées à des solutions intégrées couvrant toute la gestion du chantier. Avec une pression croissante sur la rentabilité et des exigences réglementaires, les entreprises cherchent des outils efficaces pour améliorer leur organisation. Trois approches distinctes - intégration complète, spécialisation dans le chiffrage et performance du chantier - visent toutes à simplifier le quotidien des professionnels.

Tellier Brise-Soleil turns to wood

Technicbaie · source

Tellier Brise-Soleil has launched Wood’Ligne, its first wooden shading louvre range, developed with the École supérieure du bois. This shift aims to combine the durability and aesthetics of wood alongside their existing aluminum products. The new collection features seven carefully selected wood types tailored to architectural needs.

The CSR charter of the Serge Ferrari Experts

Technicbaie · source

Le réseau Expert Serge Ferrari a signé une charte RSE pour améliorer leur impact environnemental et social. Cette initiative vise à harmoniser les pratiques responsables et à promouvoir l'innovation durable au sein des membres. À terme, le réseau prévoit de récupérer et valoriser les chutes textiles,

soutenant ainsi une économie circulaire.

The solar protection facing building overheating

Technicbaie · source

The article discusses the role of brise-soleil in addressing building overheating and enhancing visual comfort, highlighting their increasing importance due to regulatory changes. It presents findings from MSI Reports on the French market, noting a slight decline in new constructions but a projected moderate growth by 2026. Additionally, it emphasizes the benefits of brise-soleil, particularly in regulating natural light and reducing air conditioning reliance amid climate challenges.

Tertiary decree: opening times and natural light, two levers not to be overlooked [Episode 3]

Technicbaie · source

This article discusses the importance of opening and closing times for automatic doors and the impact of natural light on energy consumption in tertiary buildings. It highlights the necessity for rapid door operations to minimize energy loss and emphasizes the obligation to keep doors closed in heated or air-conditioned areas. Additionally, it addresses the optimization of natural lighting through innovative door designs, promoting better energy efficiency.

Customized shutters for heritage constraints

Technicbaie · source

La rénovation des volets d'un Ehpad à Toulon a nécessité une adaptation soignée pour préserver l'esthétique d'origine tout en intégrant l'aluminium et la fonctionnalité. Les travaux, réalisés en site occupé, ont été orchestrés pour minimiser les perturbations pour les résidents. Un défi technique a été relevé pour garantir à la fois le respect des contraintes patrimoniales et l'amélioration de la durabilité.

Urban terrace: custom shading solution

Technicbaie · source

A custom motorized awning system was implemented on a 350 m² terrace in Colomiers to provide shading, waterproofing, and thermal comfort. The project features curved architecture and integrates LED lighting, enhancing the aesthetic while maximizing outdoor space usability. Additionally, the system employs advanced technology for individual control and protection against rain and wind.

Learning in the shade of BSO

Technicbaie · source

Le pôle éducatif des Hautes Feuilles, construit à Lantenne-Vertière, utilise des brise-soleil orientables de Schenker Stores pour réguler la température tout en optimisant la lumière naturelle. Ce bâtiment, conçu par l'architecte Pierre-Jean Ravoux, met en avant des matériaux locaux et une philosophie de durabilité. Les enseignants peuvent commander les protections solaires individuellement, assurant ainsi un confort pour les élèves.

Malerba moves into its new headquarters

Technicbaie · source

Malerba has moved to its new headquarters, Maison Malerba, in Thizy-les-Bourgs on July 15, 2026, symbolizing a significant organizational transformation. The 3,822 m² building focuses on environmental sustainability and resource efficiency, featuring a circular economy approach. This investment of over 10 million euros aims to foster cohesion, digitalization, and responsibility within the workplace.

Springless sectional doors: Javey strengthens its production capacity

Technicbaie · source

Javey has launched a new profiler dedicated to producing axes for its springless industrial sectional doors, enhancing production capacity. This investment, supported by France Nation Verte, aims to industrialize springless technology while ensuring high-quality custom manufacturing. The new setup increases the number of profilers to 15, facilitating the growth of this sustainable French manufacturing solution.

Malerba gathers professionals around technical door blocks

Technicbaie · source

Malerba hosted the first edition of Malerba[T], gathering over 120 building professionals to discuss technical door blocks and related issues. The event featured practical demonstrations and discussions on the importance of integrating motorization and access control early in project planning. Industry representatives showcased diverse solutions, emphasizing collaboration between manufacturers and users.

Baptiste Puthet new commercial coordinator BU closures of StellaGroup

Technicbaie · source

Baptiste Puthet has joined StellaGroup as the new Commercial Coordinator for the Window Closure Business Unit starting March 1, 2026. He replaces Pascal Cros, who will assist during the transition while maintaining his marketing responsibilities at SAT. This change aims to enhance strategic marketing efforts within the company.

Yannick Lhermite, first sales manager Housing France for Ehret

Technicbaie · source

Yannick Lhermite has been appointed as the first Sales Manager for Habitat France at Ehret, in a new role aimed at boosting sales team support and operational effectiveness. With 16 years in the company, he will focus on recruiting new sales personnel and enhancing team skills by 2028. Key responsibilities include managing relationships with carpentry networks and overseeing the integration and training of new recruits.

François Bourgoin, new CEO of Atlantem

Technicbaie · source

François Bourgoin has been appointed as the new CEO of Atlantem, effective June 16. He brings extensive experience in global leadership and operational management from various industrial firms. His main goal will be to enhance organizational fluidity, improve customer experience, and support innovation.

Public Procurement: The Simplification Law for Economic Life Hybridizes Public-Private Partnerships Institutionalized in French Style

Lemoniteur · source

The newly introduced law simplifies public contracts, enabling a hybrid public-private partnership model. This allows for the formation of dedicated public-private companies for executing public contracts, expanding opportunities for private sector involvement. However, certain regulations continue to apply, ensuring a balance between flexibility and accountability.

In Bas-Rhin, Haguenau Hospital Launches €64M Design-Realization to Connect New and Rehabilitated Buildings

Lemoniteur · source

L'hôpital de Haguenau, situé dans le Bas-Rhin, lancera un projet de conception-réalisation de 64 millions d'euros en collaboration avec Vinci Construction. Ce projet comprend une extension de 9 000 m² pour améliorer la connexion et rationaliser l'organisation des soins entre plusieurs bâtiments. Les travaux commenceront au début de l'année prochaine et devraient s'étendre jusqu'à fin 2030.

Healthcare Facilities: €132M Contracts for Eiffage Construction and Eiffage Energy Systems

Lemoniteur · source

Eiffage Construction and Eiffage Energie Systèmes secured contracts worth €132 million for two hospital projects in France. They will work on the new medical-technical platform of CHU d’Angers and the future hospital center in Avallon. Both projects emphasize sustainable construction practices, with certifications for energy efficiency.

Landes: Securing the Place des Salines in Dax

Lemoniteur · source

Les travaux de sécurisation de la place des Salines à Dax, dans les Landes, se poursuivent avant un futur réaménagement incluant un parking végétalisé. L'opération, débutée en octobre 2025, comprend des nettoyages et forages, avec un comblement prévu pour l'automne 2027. La fin du chantier est attendue fin 2027, suivie de six mois de surveillance des terrains.

Bas-Rhin: Construction of the New Heyden Parking Near Sélestat Station

Lemoniteur · source

A Sélestat, the city of Bas-Rhin has initiated the construction of a new parking facility near the train station, scheduled for completion in April 2027. The project, costing 5 million euros, will provide 373 new parking spaces across three levels, significantly increasing overall capacity. The design incorporates energy-efficient features, including a photovoltaic installation to reduce energy consumption.

Bas-Rhin: Covered Padel Complex Project in the Elsau District of Strasbourg

Lemoniteur · source

A Strasbourg project aims to convert two unused clay tennis courts into a covered padel complex, featuring four indoor courts and a club-house. The initiative includes social access for around 1,900 local students and support for youth integration programs. Estimated at €2 million, financing will involve regional aid and private contributions, with a city meeting anticipated by October 2026.

Meeting of French Entrepreneurs at Medef: Debate on Standards Diverts to Housing and Construction Issues

Lemoniteur · source

Le débat entre candidats à la présidentielle a largement abordé les enjeux du logement, révélant une frustration face à l'inflation normative qui affecte le secteur. Gabriel Attal et Jean-Luc Mélenchon ont exprimé leurs préoccupations concernant l'impact de la réglementation sur la construction. Les propositions pour simplifier les normes et relancer la construction abondent, marquant un enjeu central pour l'économie française.

Puy-de-Dôme: Rehabilitation of the Mitterrand Building of the Law School in Clermont-Ferrand

Lemoniteur · source

The Mitterrand building of the School of Law in Clermont-Ferrand is undergoing a significant rehabilitation expected to complete by April 2027. This project involves a total investment of 30 million euros, focusing on renovations and energy efficiency improvements. The facility will reopen in September 2027, providing enhanced spaces for students and an independent library entrance.

Moselle: Restoration of Saint-Germain Church in Delme

Lemoniteur · source

La commune de Delme en Moselle prépare la restauration de l'église Saint-Germain, avec un objectif de collecte de 10 000 euros jusqu'à fin 2027. Les travaux, axés sur la toiture et les couvertures, commenceront à l'automne 2026. Cette initiative vise à préserver le patrimoine local tout en maintenant la fonction actuelle de l'édifice.

Loire-Atlantique: Energy Renovation of the Bois Rochefort School Group in Guérande

Lemoniteur · source

The Bois Rochefort school group in Guérande, Loire-Atlantique is undergoing energy renovation set to start in summer 2025, focusing on geothermal energy installation. Thirteen deep boreholes will connect to a heat pump, significantly reducing energy costs and improving building accessibility. The project, supported by multiple local organizations, is expected to be completed by the end of 2027.

Skilled Labor Shortage in Construction 2026: 41 Percent of Companies Are Really Struggling

Bauinfoconsult · source

In der Baubranche ist der Fachkräftemangel eine akute Herausforderung, die 96 % der Unternehmen betrifft. Rund 41 % der Firmen berichten von gravierenden Personalengpässen, die die Projektarbeit stark beeinflussen. Innovative Lösungen wie Digitalisierung und Robotik könnten helfen, die Auswirkungen des demografischen Wandels zu mildern.

The Construction Industry Finds: The Special Fund Helps Us Little

Bauinfoconsult · source

Die Baustoffindustrie ist skeptisch gegenüber dem deutschen Investitionssondervermögen, trotz der Erhöhung des Staatsdefizits infolge zusätzlicher Ausgaben. Nur 18% der befragten Hersteller sehen darin eine Chance für Investitionen im Jahr 2026, während 33% keine positiven Effekte erwarten. Diese

Zurückhaltung könnte durch langsame Reformen und realistische Marktbedingungen in der Hochbaubranche bedingt sein.

Construction Trends 2027: Staff Shortages and Price Increases Overshadow Growth Topics

Bauinfoconsult · source

Die Bautrends 2027 werden durch Fachkräftemangel und steigende Baukosten überschattet, so eine Umfrage unter Herstellern in der Branche. Der Einfluss klassischer Krisenthemen ist so dominierend, dass innovative Ansätze wie Nachhaltigkeit und KI-Aufwendungen in den Hintergrund treten. Diese Herausforderungen könnten die zukünftige Entwicklung der Bauindustrie signifikant prägen.

Is Bureaucracy Reduction in Construction Possible by 2030? Industry Manufacturers Wave Frustrated.

Bauinfoconsult · source

The German government aims to reduce bureaucracy in the construction industry by 2030 to streamline processes and boost construction volume. However, manufacturers express skepticism about the effectiveness and pace of these initiatives, with most believing the timeline is unrealistic. Despite some optimism from larger corporations, a significant majority of industry players doubt the success of these reforms.

GMoD: New Abbreviation, New Rules for Building Energy – What Changes Are Coming?

Bauinfoconsult · source

Das neue Gebäudemodernisierungsgesetz GModG ersetzt die 65-Prozent-Regel, wodurch neue Heizungen nicht mehr zu 65 Prozent erneuerbar sein müssen. Ab 2029 müssen fossile Heizungen schrittweise mit klimafreundlichen Brennstoffen betrieben werden, während bis 2045 100 Prozent erneuerbare Heizungen angestrebt werden. Zudem sollen Mieter und Vermieter die Kosten für neue Heizungen künftig hälftig teilen.

Social Media in the Construction Industry 2026: More Users, More Professionalism

Bauinfoconsult · source

Im Jahr 2026 nutzen bereits 95% der deutschen Nutzer ab 16 Jahren Social Media, was für die Bauwirtschaft einen neuen Standard darstellt. Eine Studie zeigt, dass über 86% der Bauakteure ein Social Media-Profil haben und die Nutzung sich zunehmend professionalisiert hat. Dabei verfolgen 38% aktiv Marketingziele durch ihre Social Media-Präsenz.

Looking Forward to 2026: Two Out of Three Construction Actors Expect Solid Revenue Results

Bauinfoconsult · source

Die deutsche Bauwirtschaft zeigt sich trotz schwieriger Rahmenbedingungen optimistisch, da die Auftragssituation im ersten Quartal 2026 zugenommen hat. Eine Umfrage unter 400 Bauakteuren ergab, dass zwei Drittel von ihnen mit Umsatzsteigerungen rechnen. Diese positive Stimmung ist vor allem bei Unternehmen im Neubau im Westen und Süden Deutschlands zu beobachten.

LinkedIn: Just Post, It Will Be Fine!?

Bauinfoconsult · source

LinkedIn is not just for job searching; it has become a vital platform for the construction industry to establish trust and connections. Providers of building materials can leverage LinkedIn to showcase expertise and stay relevant to their target audience. Effective engagement and tailored content can significantly enhance visibility and reputation.

The 4 Types of Construction Communication: Digitally Shaped Users Surpass the Traditional Fraction

Bauinfoconsult · source

BauInfoConsult's recent study reveals a shift in communication preferences within the construction industry, with digital sources surpassing traditional media. For the first time, online research and social media are viewed as the most significant information channels. This trend reflects the industry's adaptation to digitalization, highlighting the need for targeted communication strategies.

Top Management Topic Communication in Transformation – Humans as an Irreplaceable Success Factor

Bauinfoconsult · source

Transformation in the construction industry often fails due to poor communication rather than faulty strategies. Effective communication is essential for engaging employees and guiding them through change, positioning people as the key success factor. A successful transformation relies more on leadership's ability to foster dialogue and clarify goals than on the technologies employed.

Real Estate Market Study Sees Hidden New Building Deficit – and Questions the Home Ownership Segment

Bauinfoconsult · source

A recent analysis by Jones Lang LaSalle (JLL) reveals a hidden construction deficit in Germany, highlighting that new housing is being built in areas with low demand. This misalignment exacerbates the shortage of available housing in urban centers. The study raises concerns about the focus on single-family homes instead of necessary multi-family units, suggesting a need for improved economic conditions to enhance housing supply.

How Geopolitical Instability Affects the European Construction Sector

Bauinfoconsult · source

Die geopolitische Instabilität und steigende Energiepreise beeinflussen die Erwartungen im europäischen Bausektor negativ. Trotz dieser Herausforderungen bleibt der Sektor relativ widerstandsfähig, wobei viele Projekte fortgeführt und die Auftragseingänge stabil bleiben. Der Ausblick für 2027 zeigt eine optimistische Wendung, da das Wachstum in allen Märkten erwartet wird.

In 2026, Germany May Miss Its Climate Goal for the First Time

Geb-info · source

Germany's greenhouse gas emissions fell by only 2% in the first half of 2026, insufficient to meet climate targets. The energy crisis has greatly affected industrial production and transportation. Experts warn that significant measures are needed to achieve the long-term emissions reduction goals.

Photovoltaic Expansion: Summer Heat Increases Power Demand for Cooling

Geb-info · source

Die Sommerhitze erhöht den Strombedarf für Kühlung erheblich, was die Bedeutung der Photovoltaik für eine stabile Stromversorgung unterstreicht. Der Solar Cluster Baden-Württemberg fordert daher, den zukünftigen Kühlbedarf bei Photovoltaik-Anlagen zu berücksichtigen. Batteriespeicher können die Nutzung des Solarstroms bis in die Abendstunden ermöglichen.

"Green to Green": Full BEG Funding Only Available Until 2026

Geb-info · source

Die Förderung für den Austausch alter Heizungen durch erneuerbare Energiesysteme wird ab 2027 stark eingeschränkt. Eigentümer, die noch 2026 einen Antrag stellen, können die aktuellen Förderbedingungen nutzen. Dies betrifft Pelletkessel, Wärmepumpen und weitere Heizsysteme, wobei eine rechtzeitige Beantragung für die Vorteile entscheidend ist.

The Sun Helps Against Heat

Geb-info · source

The article discusses how solar thermal energy solutions, developed by Soliterm Group, address the increasing demand for both heating and cooling due to rising temperatures in Germany. A case study from Turkey highlights the effectiveness of these systems in reducing energy consumption and CO■ emissions. It emphasizes the potential for such technology to transform energy supply in various sectors, supporting a sustainable energy transition.

GModG Changes Rules for Infrared Heaters in Existing Buildings

Geb-info · source

The GModG changes regulations for infrared heating in existing buildings, removing the previous 45% requirement for energy efficiency. The primary energy factor for grid electricity is lowered, enhancing the competitiveness of infrared heaters. Exceptions apply for buildings with two apartments or less, where specific standards do not apply.

Heat Pumps as an Alternative to Air Conditioning

Geb-info · source

Wärmepumpen können sowohl heizen als auch Innenräume aktiv oder passiv kühlen, wobei die Technik und Heizflächen entscheidend sind. Aktives Kühlen erfolgt durch reversible Wärmepumpen, während passives Kühlen mit Sole-Wasser-Wärmepumpen effizient und energiesparend ist. Eine frühzeitige Planung und geeignete Kühlflächen sind unerlässlich, um die volle Kühlleistung zu erreichen.

Heat Protection and Standards Reduction: VDI Criticizes Inconsistent Policy

Geb-info · source

The VDI criticizes the contradictory approach of the government in promoting heat protection while simultaneously abolishing important building standards. This inconsistency raises concerns about legal uncertainties and potential lawsuits due to the lack of clear technical norms. The VDI emphasizes the necessity of a thorough review before removing any standard references to ensure safety and reliability.

FVH Warns of Wrong Priorities in Climate Protection Program

Geb-info · source

The FVH criticizes the draft of the Natural Climate Action Program for failing to address key energy and climate realities adequately. They advocate for realistic adjustments to CO2 sink targets and emphasize the importance of sustainable wood usage in replacing fossil fuels. The organization calls for a broader discussion on achievable climate goals and effective measures.

EEG Target 2026 Achieved: Industry Warns of Expansion Drop

Geb-info · source

Germany has achieved a significant milestone in solar energy by surpassing 128 GW of installed photovoltaic capacity as of August 2026, fulfilling the EEG target for the year. However, the BSW-Solar warns of potential slowdowns in future expansions unless investment conditions improve. The organization emphasizes that to meet ambitious goals of 215 GW by 2030, a higher annual installation rate is necessary.

Gas Prices for New Customers Reach New Highs

Geb-info · source

Gas prices for new customers have reached a record high, with the average recommended tariff now at 11.56 cents per kilowatt-hour, an increase of approximately 23% since February 2026. The surge is attributed to conflicts in the Middle East impacting European gas markets, despite Germany's relative independence from Middle Eastern supplies. Consumers are advised to compare tariffs before the winter to secure savings.

What to Consider When Retrofitting Air Conditioning Units

Geb-info · source

Mieter in Deutschland stehen vor Herausforderungen bei der Nachrüstung von Klimageräten, da oft eine Genehmigung des Vermieters notwendig ist. Die Installation erfordert bauliche Änderungen, die den Energieverbrauch und die Nachbarschaftsinteressen betreffen. Gesetzesänderungen könnten den Prozess erleichtern, aber es sind rechtliche und praktische Hürden zu beachten.

Survey: Cost Factor Determines Heating Purchase

Geb-info · source

A recent Civey survey reveals that nearly two-thirds of homeowners prioritize economic factors when purchasing new heating systems, particularly focusing on acquisition, operational, and maintenance costs. Pellet heating owners weigh future viability and the use of renewable energy sources more heavily in their decisions. However, funding for heating exchanges has decreased since summer 2026, impacting economic evaluations.

Associations Reject EU Draft on Construction Products

Geb-info · source

Fourteen associations from the construction and window industries have urged Germany to oppose new EU regulations on construction products. They argue that these guidelines will increase bureaucracy, raise construction costs, and negatively impact small and medium-sized enterprises. The

groups are calling for a fundamental revision of these rules before they become binding.

New Rules Change Compensation for Private Solar Power

Geb-info · source

Ab 2027 wird die Einspeisung von Strom aus privaten Photovoltaik-Anlagen auf 60% gedeckelt, während die Vergütung auf maximal drei Jahre beschränkt ist. Bestehende Anlagen, die bis Ende 2026 installiert werden, erhalten Bestandsschutz. Unklare Wirtschaftlichkeit und sinkende Kosten für Solaranlagen erschweren jedoch die Entscheidung für private Bauherren.

Heating Fittings Industry Focuses on Modernization and Cooling

Geb-info · source

The heating armature industry shows signs of recovery amidst rising building demands, particularly for water-based systems that efficiently combine heating and cooling. Despite a 7% revenue decline in the first half of 2026, positive order signals indicate a cautious optimism for modernization efforts. Enhancing energy efficiency and comfort in existing buildings is crucial for adapting to future climate conditions.

KIT Develops Hybrid Roof System for Electricity, Heat, and Cooling

Geb-info · source

Researchers at KIT have developed a hybrid roof system that generates electricity, heat, and cooling simultaneously from a single surface by combining photovoltaics with passive daytime radiative cooling. The prototype can cool buildings while producing a measurable electrical output and harnessing solar energy. This innovative technology aims to transform roofs and facades into multifunctional energy surfaces for sustainable applications.

Construction Boom 2025-2040 – Free Whitepaper Available

Geb-info · source

The whitepaper on German construction trends from 2025 to 2040 offers insights for planning offices with three main theses: they act as early indicators, anticipate peaks and lows in planning markets, and require their own warning signals to prepare for downturns. It emphasizes the stability of cyclical patterns over decades and highlights the need for strategic foresight. This document is free until September 13, 2026, and then available for a fee.

Tangerhütte is Energy Municipality of the Month August

Geb-info · source

Tangerhütte has been recognized as the Energy Community of the Month for August 2026, highlighting its commitment to renewable energy sources such as wind, solar, and biomass. The town, with a population of about 10,000, has already generated around 261 MW of electricity from renewable sources, with significant future expansions planned. Local citizen engagement is pivotal, as seen with community projects like the solar park in Uchtdorf and the development of a bioenergy village.

Heat Pumps and Heat Networks to Cover Four Fifths of Heat Demand by 2045

Geb-info · source

A recent study analyzed around 380 heating plans, showing that heat pumps and district heating will cover four-fifths of the heat demand by 2045 in Germany. Significant gaps remain in assumptions about renovations and biomass usage. The research emphasizes the need for transparent planning in the energy transition.

Heat Pump Sales Grow by 40 Percent

Geb-info · source

Der Absatz von Wärmepumpen in Deutschland ist im ersten Halbjahr 2026 um 40% auf 195.000 Anlagen gestiegen. Dieser Anstieg wird durch das gestiegene Verbraucherbewusstsein für fossile Energien und die effektiven Förderprogramme der Bundesregierung gefördert. Langfristige Planungen zur Fortführung der BEG-Förderung bis 2030 stärken die Investitionsbereitschaft in der Branche.

Warm Water Heat Pump as an Entry Point into Heat Pump Technology

Haustec · source

Die WWK-I 300 Plus von Stiebel Eltron ist eine ausgezeichnete Warmwasser-Wärmepumpe und Testsieger bei Stiftung Warentest, bekannt für ihre hohe Effizienz und geringe Geräuschentwicklung. Sie ermöglicht Hausbesitzern den einfachen Einstieg in die Wärmepumpentechnik, ohne die bestehende Heizungsanlage sofort wechseln zu müssen. Die Bedienung erfolgt einfach über einen Drehregler oder komfortabel per App.

Can a Heat Pump Make You Sick Despite Complying with Noise Limits?

Haustec · source

Das Landgericht Bielefeld hat eine Nachbarschaftsklage gegen die Geräuschemissionen einer Wärmepumpe abgewiesen, da die TA Lärm-Werte eingehalten werden. Die Kläger, ein älteres Ehepaar, berichteten von gesundheitlichen Beschwerden durch tieffrequente Brummtöne, jedoch ohne wesentliche Beeinträchtigung nachgewiesen. Das Gericht stellte fest, dass subjektive Empfindlichkeiten der Kläger nicht ausschlaggebend für die Beurteilung sind.

Mitsubishi Electric at Chillventa 2026: Sustainable Cooling, Climate, and Heat Pump Solutions

Haustec · source

Mitsubishi Electric showcases innovative cooling and heating solutions at Chillventa 2026, focusing on energy efficiency and sustainable refrigerants. Their products, including the award-winning MSZ-RZ wall unit, utilize R290 and R32 refrigerants to meet modern climate demands. The exhibition highlights their commitment to supporting sustainable building concepts across residential, commercial, and IT cooling applications.

Ground Probes and Brine/Water Heat Pumps for New Administration Building

Haustec · source

BauGrund Süd's new office building promotes sustainability with 400-meter deep ground probes and three brine/water heat pumps for heating and cooling. It also features a photovoltaic system, adhering to the KfW 40 energy efficiency standard. This facility will support 80 jobs and foster collaboration among various subsidiaries in geotechnical fields.

Planning Heat Pumps Properly: What VDI 4645 and VDI 4646 Offer in Practice

Haustec · source

The article discusses the planning and implementation of heat pumps in residential and industrial settings based on VDI 4645 and VDI 4646 guidelines. It emphasizes the importance of a systematic approach that considers various factors such as energy sources, temperature levels, and operational efficiency. Both guidelines aim to enhance the effectiveness of heat pump systems by providing a structured planning framework.

Heat Pumps: Online Training for VDI 4645 and VDI 4646

Haustec · source

Die Hitzköpfe Academy bietet Online-Schulungen zu den VDI-Richtlinien 4645 und 4646, die sich auf die Planung und Installation von Wärmepumpen in Wohn- und Gewerbebauten konzentrieren. Die Schulungen beinhalten praxisrelevante Inhalte sowie vorbereitende Videos, um den Wissensstand der Teilnehmer zu optimieren. Diese Weiterbildungsangebote adressieren Fachhandwerker und Planer, um die Anforderungen moderner Wärmepumpentechnologie zu erfüllen.

Thermoelectric Exhaust Heat Pump: Combining Ventilation with Heating and Cooling

Haustec · source

A team from FH Aachen has developed a thermoelectric exhaust air heat pump that integrates heating, cooling, and ventilation into a compact system. This technology aims to provide energy-efficient solutions for modular buildings, significantly reducing greenhouse gas emissions. The heat pump uses thermoelectric elements to enhance efficiency and allows for a space-saving installation, ideal for various applications.

GModG Changes Rules for Infrared Heaters in Existing Buildings

Haustec · source

The new GModG regulations, effective since July 29, 2026, simplify requirements for existing buildings with infrared heating. Key changes include the elimination of the extra 45 percent energy-saving requirement, coupled with a reduction in the primary energy factor for grid electricity from 1.8 to 1.5, enhancing the competitiveness of infrared heating systems. Exemptions for buildings with up to two apartments occupied by the owner continue, allowing for greater flexibility in implementing direct electric heating.

Gas Prices for New Customers Reach New Highs

Haustec · source

Die Gaspreise für Neukunden haben einen neuen Höchststand erreicht, mit einem Anstieg von rund 23 Prozent seit Februar 2026. Die empfohlenen Tarife kosten im Schnitt 11,56 Cent pro Kilowattstunde, was Verbrauchern hohe Einsparungen beim Wechsel ermöglichen kann. Experten warnen jedoch vor ungewissen zukünftigen Preisentwicklungen aufgrund geopolitischer Spannungen.

Survey: Cost Factor Determines Heating Purchase

Haustec · source

Eine Umfrage zeigt, dass bei der Anschaffung neuer Heizungen Wirtschaftlichkeit und Kosten entscheidende Faktoren für Hausbesitzer sind. Besonders Besitzer von Pelletheizungen legen Wert auf die zukünftige Nachhaltigkeit ihrer Heizung. Der Rückgang der Förderungen seit 2026 beeinflusst ebenfalls die Kaufentscheidungen.

Heating Fittings Industry Sees Recovery and Calls for Focus on Cooling

Haustec · source

The heating armature industry is experiencing a cautious recovery after a 7% drop in revenue during the first half of 2026, with incoming orders exceeding last year's figures by 9%. There is a focus on combined heating and cooling systems as the sector adapts to increasing temperatures. Industry leaders highlight significant potential for efficiency improvements in existing buildings using

water-based systems.

Enpal and Bosch Integrate Smart Thermostats into Heat Pump Offer

Haustec · source

Enpal has integrated Bosch Smart Home thermostats into its portfolio, aiming to enhance energy efficiency for new heat pump customers since July 2026. This partnership further develops their energy system, optimizing heating performance through smart controls. Both companies strive to connect energy generation and usage, significantly reducing heating costs for users.

Comfort in Multi-Family House with Heat Pump and Exergy Machine

Haustec · source

Ein Mehrfamilienhaus in Weil im Schönbuch nutzt eine Wärmepumpe und eine eXergiemaschine für effiziente Wärme- und Warmwasserversorgung. Durch innovative Planung wird hoher Wärmekomfort bei niedrigen Heizkosten erreicht. Die Installation beinhaltet eine PV-Anlage zur Unterstützung der Energieversorgung.

Heat Pump Electricity/Gas Price Barometer in July 2026

Haustec · source

The article discusses the WP electricity/gas price barometer for July 2026, showcasing the electricity/gas price ratio for twelve locations in Germany. It highlights that prices for heating energy vary regionally due to network usage fees. The reference locations selected do not represent the full cost range across Germany.

Heat Pump Sales Increase by 40 Percent in First Half of 2026

Haustec · source

In the first half of 2026, the sale of heat pumps in Germany surged by 40%, reaching 195,000 units, signaling progress towards the government’s goal of 500,000 annual installations. This growth is attributed to increasing consumer awareness of fossil fuel risks and the success of government funding programs. The market outlook remains positive despite challenges like rising energy prices and costs related to fossil energy dependence.

Efficiency Differences in Available Air/Water Heat Pumps

Haustec · source

A study of 25 air/water heat pumps using R290 refrigerant reveals significant variances in efficiency and technology metrics, with SCOP values ranging from 4.50 to 5.90. Key factors influencing

performance include evaporator size and modulation capabilities. Optimizing efficiency necessitates detailed partial load data to enhance operational efficacy.

Practice Report: Large Heat Pump Project in Oldenburg

Haustec · source

In Oldenburg, a private developer aims to heat their buildings entirely with renewable energy by 2035. Collaborating with Weber & Reil GmbH, they started developing supply scenarios using nine air/water heat pumps. This initiative marks the beginning of a sustainable heating supply for several existing buildings.

Atec: Drinking Water Hygiene Storage eTwin for Single-Family Homes

Haustec · source

The Atec eTwin is a compact combined storage system for drinking and heating water, designed for single-family homes. It features a patented design that ensures hygiene standards while being compatible with various heating systems and offers efficient thermal separation. With an easy installation process and optimized for use with heat pumps, it minimizes standby heat losses and meets high efficiency requirements.

Heating Walls in Practice: Completion, Commissioning, and Handover

Haustec · source

In the final part of the series, Frank Hartmann discusses the completion and commissioning of a modernized heating system in a 1988 single-family home. Key components of the system were tested and operated before the owners were trained on its use. The article highlights the importance of thorough checks and instructions for ensuring optimal operation.

Drinking Water Heating with Heat Pumps in Multi-Family Homes

Haustec · source

In Mehrfamilienhäusern erfordert die Wärmepumpentechnologie für die Trinkwassererwärmung eine präzise Planung, um das ganzjährig hohe Temperaturniveau zu gewährleisten. Es stehen nachhaltige Lösungen für zentrale und dezentrale Systeme zur Verfügung. Wärmepumpen spielen eine Schlüsselrolle auf dem Weg zu einem klimaneutralen Gebäudebestand.

Plate Heat Exchangers: Performance, Design, and Common Errors in SHK Practice

Haustec · source

Plattenwärmetauscher sind effiziente Geräte, deren Leistung jedoch durch falsche Auslegung und mangelhafte Wasserqualität beeinträchtigt werden kann. Der Artikel erläutert wichtige Aspekte bei Einbau, Betrieb und Wartung, um häufige Fehler zu vermeiden. Ein fokussierter Betrieb und die Berücksichtigung spezifischer Anforderungen sind entscheidend für die Leistungsfähigkeit.

Practice Report Air-Air Heat Pumps: Efficient Heating and Cooling Combined

Haustec · source

Luft-Luft-Wärmepumpen bieten eine effiziente Lösung für Heizen und Kühlen in einem System, wie ein Praxisbeispiel zeigt. Nach der Sanierung eines Doppelhauses sanken die Energiekosten um etwa 40 Prozent. Die Bedeutung eines komfortablen Raumklimas im Sommer wird oft vernachlässigt, ist jedoch für die Gesundheit und das Wohlbefinden entscheidend.

Multifire Archie: Palazzetti's Hybrid Stove Combines Wood Fire and Pellet Comfort

Haustec · source

Der Multifire Archie von Palazzetti ist ein innovativer Hybridofen, der sowohl Holz als auch Pellets für die Wärmeproduktion nutzt und automatisch den Brennstoff wechselt. Mit einem leistungsstarken Design von bis zu 14 kW vereint er die Vorteile beider Heizmethoden, einschließlich einer Bedienung über eine App. Zudem bietet er einen Natural Flame-Modus für den Einsatz ohne Strom und erfüllt die Ökodesign 2022-Richtlinie mit Energieeffizienzklasse A+.

Brötje: IWR DataConnect and IWR IDA Basic

Haustec · source

Brötje has expanded its digital control platform with two new components: the IoT Gateway IWR DataConnect and the room device IWR IDA Basic, facilitating easy operation and connectivity of heating systems. The IWR DataConnect serves as the communication hub, linking heating generators directly to the cloud for user control via the Brötje Home Comfort App. Together, these devices provide homeowners with modern control functions and assist professionals during installation and maintenance.

BEG: New Heat Pump Funding at a Glance

Haustec · source

Since July 2026, new funding conditions for heat pumps allow self-owners to receive grants of up to 80%. The funding rates will gradually decrease starting in 2027, making early planning crucial. Various bonuses based on income and the speed of replacing fossil heaters can further enhance the benefits.

Municipal Heat Planning: Germany's Large Cities Plan Exit from Gas

Haustec · source

In Germany, major cities are planning a shift away from natural gas in their heating strategies, focusing on climate-friendly alternatives. The analysis indicates that most cities have two primary supply routes: district heating in dense urban areas and decentralized solutions in less populated regions. Despite challenges and scepticism towards new energy legislations, many cities aim for climate neutrality ahead of national targets.

Public procurement: Euractiv on subcontracting chains in public construction at the European Parliament

TheConstructionVoice · source

As the European Commission prepares to reform EU procurement rules, unions and employers are advocating for limits on subcontracting to enhance safety and accountability. They argue that excessive layers of subcontractors lead to unsafe working conditions and diluted responsibility. A proposed revision of public procurement rules presents an opportunity to establish more stringent regulations on subcontracting.

Evonik: Specialty Chemicals Company Appoints Interim CEO

Kunststoffweb · source

Dr. Claus Rettig has been appointed as the interim CEO of Evonik, stepping in for Christian Kullmann who is recovering from surgery. Rettig has a long tenure at Evonik and will continue to oversee the company's Asia operations. The duration of his interim role remains uncertain.

Fysol: Acquisition of Turkish Besler Glassfiber

Kunststoffweb · source

Fysol has acquired Turkish competitor Besler Glassfiber, boosting its position in the European market. This acquisition surpasses Johns Manville, placing Fysol behind market leader Praana. CEO Marc Hubert sees significant potential for future expansion from Besler.

Gurit: More Dynamics Expected in the Second Half of the Year

Kunststoffweb · source

Gurit, a composites specialist based in Switzerland, has raised its revenue forecast for 2026 following improved results in the first half of the year. The company expects a revenue increase of 9 to 11 percent, reflecting a stronger momentum in the second half. Despite a 6.6 percent decline in revenue compared to the previous year, adjusted figures show a positive growth of 9.1 percent.

Evertis: Portuguese PET Film Manufacturer Expands in Mexico

Kunststoffweb · source

Evertis has established a co-extrusion line for multi-layer PET cast films in Pesquería, Mexico, aimed at producing ultra-thin films. The facility, set to be completed in August 2026, responds to rising demand for high-performance films with reduced material usage. CEO Manuel José Matos Gil emphasizes the significance of Mexico in their North American operations.

Epigral: First Epoxy Resin Plant in India Set to Go Live in 2028

Kunststoffweb · source

Epigral, initially a fertilizer producer, plans to invest 54 million EUR in establishing India's first epoxy resin production facility in Gujarat. By 2026, they aim to start a pilot plant, with full-scale production by spring 2028, responding to anticipated double-digit demand growth for epoxy resins. The company also seeks to transition to a specialty chemicals producer while expanding its PVC production.

Somfy’s Zigbee 3.0 Shades Will Soon Have Native Control4 Integration

Trivantage Announces Exclusive Sunbrella Fusion Collection

Wf-vision · source

Trivantage has launched the Sunbrella Fusion Collection, which includes 144 unique fabrics designed for durability and style. The collection aims to support creative designers and will be showcased at various industry events this fall. This new collection highlights innovation in fabric design.

OPTEX Introduces OPTEX 2.0 Self-Assembly Exterior Screen System

Wf-vision · source

The article reports on OPTEX's launch of a self-assembly exterior screen system that provides solar protection and privacy. This innovative system is designed for easy installation, enhancing comfort in residential areas. It allows users to effectively control solar heat and glare.

September’s Must-See Design Events

Wf-vision · source

September features a plethora of design events globally, from Paris to Las Vegas, showcasing new products and offering networking opportunities. Events include Paris Design Week, London Design Festival, and several market fairs across the US. Attendees can explore the latest trends and connect with industry professionals.

TWOPAGES and Amy Courtney Bring Coastal Style Home

Wf-vision · source

TWOPAGES has partnered with designer Amy Courtney to launch a textile collection inspired by coastal living. The collection includes five designs with natural motifs, crafted in linen. It is designed for home use with a relaxed aesthetic.

Nina Cooper Named President of Skyline Window Coverings

Wf-vision · source

Nina Cooper has been appointed president of Skyline Window Coverings, focusing on leading the company's growth and maintaining luxury service standards. Cooper has extensive experience in retail

management and talent development. Her leadership is expected to enhance the brand's market presence.

Carsan Window Fashions: Heat Is Your Callback Bill

Wf-vision · source

Carsan Window Fashions highlights the performance gap between PVC and Wood-X blinds under high heat conditions. While PVC bows at temperatures above 125°F, Wood-X maintains its shape up to 170°F, preventing costly service callbacks. The article emphasizes the hidden costs of heat failures for dealers and promotes Carsan's vertically integrated manufacturing.

Denvelops and Eurecat win the Delta Gold Award for a pergola developed to generate seasonal shade in urban spaces

Interempresas · source

Denvelops and Eurecat have won the Delta de Oro award for their innovative urban pergola designed to generate seasonal shade. This solution features dynamic textures and movements, enhancing urban spaces while reducing wind loads. The project represents a successful integration of engineering and aesthetics, aimed at addressing climate change challenges.

Innaltech expands its range of glass curtains for pergolas with two opening systems

Interempresas · source

Innaltech has expanded its range of glass curtains for pergolas with two distinct opening systems. The Glasstech Slide and Glasstech Space systems enhance usability and design while providing protection against wind and rain. These solutions integrate seamlessly into outdoor environments, offering a minimalist aesthetic and customizable features.

The integration of home automation systems from the project phase strengthens energy efficiency

Interempresas · source

Zennio emphasizes the importance of integrating home automation systems during the architectural design phase to enhance energy efficiency. The use of standardized protocols like KNX enables interoperability and future adaptability among different manufacturers. This evolving approach optimizes building functionality through smart management of lighting, climate, and energy consumption.

A-OK Motors AM60 Plus FSK WIFI tubular motors

Interempresas · source

The A-OK Motors AM60 Plus FSK Wifi is a tubular motor designed for large awnings, featuring electronic end-of-stroke technology and bidirectional Wi-Fi control. Key attributes include its sensitivity to climatic conditions and options for double end-of-stroke programming. The motor is equipped with high-frequency capabilities and a patented brake structure, ensuring efficiency and safety.

Synergy and adaptation: KE’s vision for customized hospitality on Lago Maggiore

Interempresas · source

El Camping Eden, ubicado en el Lago Maggiore, presenta su nueva pérgola bioclimática Kedry Prime, diseñada para fusionar confort contemporáneo con la belleza natural. Este espacio versátil, creado en colaboración con KE Contract y Pizzini dal Molin Architetti, refuerza la hospitalidad y mejora la zona de restauración. La instalación garantiza protección contra el clima variable, integrando tecnología y diseño arquitectónico.

Bioclimatic pergolas gain prominence in contemporary architecture

Interempresas · source

Las pérgolas bioclimáticas están ganando protagonismo en la arquitectura actual, convirtiéndose en elementos clave para la eficiencia energética y el bienestar. Su diseño integral permite regular la radiación solar y optimizar la ventilación, mejorando el confort en espacios exteriores. Grupo Ayuso ha desarrollado la pérgola Vértika, que se adapta automáticamente a las condiciones climáticas, logrando un uso eficiente del ambiente.

Fixed roofs Tecnikor TKF Evolution

Interempresas · source

Tecnikor presents the TKF Evolution, a modern fixed roof system ideal for integrating with glass enclosures and veranda awnings. Its sleek design allows for a flat installation, enhancing aesthetic appeal while featuring aluminum caps and integrated lighting. The roof accommodates various materials, ensuring versatility in architectural applications.

Applications are still open for the upcoming Veteco Awards

Interempresas · source

El plazo para presentar candidaturas a los Premios Veteco sigue abierto, destacando proyectos de fachada ligera y ventanas. Estos galardones promueven la innovación y sostenibilidad en el sector de la construcción. La feria Veteco se llevará a cabo en Madrid del 10 al 13 de noviembre.

Roll-up mosquito nets

Interempresas · source

The article discusses the benefits of registering on the Interempresas platform. It highlights various resources available for businesses and professionals in the industrial sector. By signing up, users can access valuable networking opportunities and promotional tools.

TGM – Gómez Awnings optimizes critical tasks in its production thanks to Ibernova's industrial software

Interempresas · source

TGM – Toldos Gómez enhances production efficiency and cost control through a collaborative software solution with Ibernova and Inforhouse. This integration facilitates real-time visibility and data-driven decision making, significantly transforming operational workflows. The modernization allows precise project cost analysis, supporting their customized business model.

AGC shapes the urban profile of London thanks to innovation in glass and facade engineering

Interempresas · source

Paddington Square, a new mixed-use real estate project in London, features 18 stories with premium office spaces and vibrant retail areas. Designed by Renzo Piano, it boasts a sophisticated double-skin glass facade that maximizes natural light and energy efficiency. The building achieved BREEAM 'Excellent' certification, reinforcing its commitment to sustainability and modern architecture.

Innaltech expands its offer of glass curtains for pergolas with two opening systems

Interempresas · source

Innaltech has expanded its offering of glass curtains for pergolas with two innovative systems: Glasstech Slide and Glasstech Space. These systems enhance outdoor spaces by providing protection

from the elements while maintaining light entry and visibility. Designed for residential and architectural projects, they feature minimalist aesthetics and customizable finishes.

Tubular motors A-OK Motors AM60 Plus FSK WIFI

Interempresas · source

A-OK Motors offers the AM60 Plus FSK Wifi tubular motor designed for large awnings, featuring an electronic end-stop and bi-directional Wi-Fi technology. It includes advanced climate sensors and a patented brake system for enhanced durability. The motor operates at 863.3 MHz frequency and is suitable for use in various weather conditions.

Afelma claims that energy rehabilitation of hospitals and schools should prioritize improving building envelopes

Interempresas · source

Afelma advocates for the energy rehabilitation of hospitals and schools, emphasizing the importance of improving building envelopes to enhance energy efficiency and comfort. They argue that public investment should focus on reducing energy demand rather than merely increasing air conditioning capacities. This approach will lead to long-term benefits including improved conditions for students and patients.

Cortina Percoter Perkris

Interempresas · source

Percoter, S.L. introduces the Perkris aluminum chain curtain, designed for both indoor decoration and outdoor protection against insects. This product enhances elegance and creates a warm atmosphere in interiors. For more information, customers are encouraged to request details.

Technal features in a rehabilitation open to the landscape

Interempresas · source

Technal has played a key role in the transformation of the BAS residence in Mendexa, enhancing the relationship between interior spaces, natural light, and the surrounding landscape. The project incorporates large openings and a minimalist design to create a serene atmosphere, promoting continuity between living areas and outdoor terraces. This rehabilitation underscores the seamless integration of modern solutions with the original structure.

Oscillobatiente systems Savio - PTA Ribanta5

Interempresas · source

The Ribanta 5 oscillating system by Savio offers a functional aesthetic and quick installation for aluminum profiles. It features pre-mounted components, intuitive adjustments, and varying load capacities up to 170kg, ensuring adaptability for different needs. This certified solution combines modern design with efficiency, making it ideal for residential and commercial projects.

How to choose hardware and accessories for aluminum carpentry?

Interempresas · source

Forcadell Accesoris emphasizes the significance of selecting high-quality hardware and accessories in aluminum carpentry, as they directly impact durability and customer satisfaction. The article discusses mechanical requirements, corrosion resistance, and energy efficiency for various opening systems. It concludes that professional-grade components are essential for long-term success in the industry.

Professional glass robots Ks Schulten KS320

Interempresas · source

El KS Robot 320 es un robot cristalero profesional diseñado para la instalación de cristales pesados en espacios reducidos. Su sistema de articulación permite movimientos eficientes, garantizando seguridad y precisión durante el montaje. Ideal para trabajos en interiores, fachadas y zonas de difícil acceso.

STAC invests more than 20 million euros in its facilities in Padrón

Interempresas · source

STAC has committed over 20 million euros to expand its facilities in Padrón, enhancing industrial capacity and logistics. This investment follows a previous 25 million euro investment in 2022, reinforcing STAC's growth strategy in Galicia. The expansion aims to improve efficiency and support international expansion efforts.

Multifunction sealing tapes 4.0 ISO-Bloco Hybratec

Interempresas · source

ISO-Bloco Hybratec is a multifunctional sealing tape designed for passive houses and energy-efficient renovations, offering excellent air tightness and rain resistance. Its innovative hybrid technology ensures high functional reliability and energy savings, with a long-term capacity to absorb movement. Ideal for various applications, it complies with future EU building regulations.

Bioclimatic pergolas gain prominence in contemporary architecture

Interempresas · source

Las pérgolas bioclimáticas están emergiendo como elementos esenciales en la arquitectura contemporánea, aportando eficiencia energética y mejores ambientes exteriores. Estas estructuras regulan la radiación solar y mejoran el confort de los espacios intermedios en edificios. Grupo Ayuso ha desarrollado soluciones avanzadas que integran tecnología para adaptarse automáticamente a las condiciones climáticas.

Electronic invoicing: with only days to go, many SMEs are not ready

Batiactu · source

A partir du 1er septembre 2026, toutes les entreprises françaises devront être capables de recevoir des factures électroniques via des plateformes d'État. Les grandes entreprises devront également émettre leurs factures en format électronique d'ici cette date, tandis que les petites entreprises auront jusqu'en 2027. Cette réforme vise à simplifier la gestion des factures et à réduire la fraude à la TVA, avec des gains estimés en milliards pour l'État et les entreprises.

Housing construction: permits decline, but construction starts progress

Batiactu · source

In July 2026, housing construction permits dropped by 2.5%, reaching a total of 29,577, continuing a downward trend following a prior spike. In contrast, the number of housing units started surged by 8.9%, totaling 27,677, primarily driven by collective housing. Despite these short-term improvements, long-term trends remain negative in both permits and construction starts.

2027 budget proposal: the minister wants to give "breathing room to social landlords"

Batiactu · source

The article discusses the role of housing in the upcoming presidential campaign, highlighting concerns voiced by candidates about previous poor decisions impacting the housing sector. Gabriel Attal, one such candidate, emphasizes the need for better focus on housing issues during the election. This reflects a growing acknowledgment among politicians of the importance of housing in their agendas.

Women still facing stereotypes in the construction sector

Batiactu · source

Women in the construction industry continue to face significant stereotypes despite a slight increase in their representation, currently at only 12% of the workforce. A mere 2% of these women occupy positions on construction sites, highlighting persistent inequalities. The discussion during the recent round table at the Gustave School underscored the need for further progress and change.

Works insurance: the owner's guarantee

Batiactu · source

L'assurance construction, instaurée par la loi Spinetta en 1978, impose aux maîtres d'ouvrage de souscrire une dommage-ouvrage pour couvrir les travaux engageant leur responsabilité. Elle vise à protéger la solidité et la sécurité des constructions en préfinançant les réparations sans attendre des procédures judiciaires. La garantie, valable dix ans, suit le bien et s'applique à divers acteurs du secteur de la construction.

HLMs can now sell to individuals wanting to do 'Jeanbrun'

Batiactu · source

Un décret du 25 août 2026 permet aux organismes HLM de vendre des logements à des investisseurs individuels pour les louer sous le régime fiscal 'Relance Logement'. Ce dispositif, instauré par la loi de finances du 19 février 2026, vise à relancer l'investissement locatif en facilitant l'accès à ces logements. Désormais, les sociétés HLM peuvent vendre une partie des logements qu'elles produisent, favorisant ainsi l'engagement des investisseurs.

Ensuring your social obligations is possible

Batiactu · source

Les dirigeants du BTP négligent souvent l'impact des indemnités de fin de carrière sur leur trésorerie. Deux solutions existent pour couvrir ces obligations : constituer une provision ou souscrire un contrat d'assurance dédié. L'option d'assurance permet de gérer les coûts sur le long terme et améliore la valorisation de l'entreprise.
